

Moe Alsumidaie, MBA, MSF

Based in New York City, Moe Alsumidaie is Annex Clinical's Chief Data Scientist. Moe has more than 10 years of extensive experience in business analytics, clinical trials and healthcare business operations. Moe's expertise includes leveraging analytics to draw comprehensive business pictures and utilizes financial and business acumen to recommend strategies for successful clinical trial operational execution.

Moe's experience stems from biopharmaceutical setting clinical research including Phase I-IV cardiology, oncology, immunology, neurology and medical device clinical trials. Moe has worked in clinical trial project management for Ivy League Institutions including Stanford Medical Center, and The Mount Sinai Medical Center where he has interacted directly with study subjects, and Fortune 500 & 100 biopharmaceutical and medical device enterprises including Abbott Vascular Devices, Genentech and Roche.

Moe has been invited to present case studies at several clinical trial conferences, he is an Editorial Advisory Board member at AppliedClinicalTrialsOnline.com, he has been mentioned in the Financial Times as an industry expert.

Moe holds a BS in Physiology & Neuroscience from UC San Diego, an MBA and a MS in Investment Finance with Beta Gamma Sigma status from Northeastern University's College of Business Administration.
